

- ### LEGEND
- MESOZOIC**
    - CRETACEOUS**
      - LATE**
        - Quartz Diorite
        - Pyroxene diorite with subordinate tonalite and amphibolite
        - Ultramafic - Mafic rocks: peridotite, pyroxenite and olivine gabbro
        - Gabbro-norite with subordinate pyroxene diorite and tonalite
      - EARLY**
        - Mix zone-metadiorite, pyroxenite, amphibolite and paragneiss
        - Massive amphibolite with subordinate banded amphibolite
        - Banded amphibolite
    - METASEDIMENTS**
      - Schist, gneiss, migmatite and banded amphibolite
  - QUATERNARY**
    - Moraine and Alluvium

- ### GEOLOGICAL SYMBOLS
- Foliation
  - Vertical foliation
  - Layering
  - Contact, dashed where probable
  - Fault, dashed where uncertain
  - Shear zone
  - Anticline
  - Syncline
  - Gold showings
  - Spring
  - Pass
  - Karakorum Highway
  - Unmetalled road
  - Gah (stream)
  - Cross-section Line
